1 **Foundation of GEOSYSTEMS France -**
2 **New distributor for Leica Geosystems**
3 **Geospatial Imaging software in France**

4

5 *Germering, 02-Oct-2006 -* **GEOSYSTEMS, exclusive**
6 **distributor of Leica Geosystems Geospatial**
7 **Imaging, LLC in Germany, and MFB-GeoConsulting,**
8 **distributor in Switzerland, announce the**
9 **foundation of GEOSYSTEMS France S.A.R.L on the**
10 **1st of October 2006. GEOSYSTEMS France is**
11 **entirely dedicated to distribute Leica Geosystems**
12 **software products for remote sensing, digital**
13 **photogrammetry and 3D applications. The staff of**
14 **the newly set up company is committed to support**
15 **users in France and French speaking African**
16 **countries.**

17

18 Patrice Lemire, managing director of GEOSYSTEMS
19 France, with many years experience as support engineer
20 and key account manager of Leica Geosystems, stands for
21 a continued personal contact to Leica Geosystems users
22 in France. Located in Montigny-le-Bretonneux near Paris,
23 GEOSYSTEMS France is authorized distributor for ERDAS
24 IMAGINE®, Leica Photogrammetry Suite, ArcGIS
25 Extensions by Leica Geosystems and complementary
26 software modules. In addition GEOSYSTEMS France offers
27 a complete range of services like technical support,
28 individual training, software customization and project
29 consulting. GEOSYSTEMS France will clearly benefit from

30 the outstanding experience of its mother companies
31 GEOSYSTEMS in Germany and MFB-GeoConsulting in
32 Switzerland. Both companies are proven experts in the
33 earth observation and geoinformatic business since more
34 than 17 and 7 years respectively.

35

36 "With the foundation of GEOSYSTEMS France, Leica
37 Geosystems Geospatial Imaging will have a strong and
38 competent representation for all of their products in
39 France and French speaking Africa. We are looking
40 forward to a fruitful co-operation with the highly
41 motivated staff at GEOSYSTEMS France and are excited
42 about this opportunity to expand our network in Europe"
43 underline both, Dr. Ludwig Abele, managing director at
44 GEOSYSTEMS in Germany and Dr. Michael Baumgartner,
45 managing director MFB-GeoConsulting in Switzerland.

About GEOSYSTEMS GmbH Germany

GEOSYSTEMS is a private sector enterprise, founded in 1989 and located in Germering on the outskirts of Munich, Germany. As authorized and exclusive distributor of Leica Geosystems Geospatial Imaging, LLC. GEOSYSTEMS is a true representative of an expert in geospatial imaging. Its software products power the Geospatial Imaging Chain - the definitive industry workflow of capturing, referencing, mapping, analyzing and presenting geospatial information. In addition to Leica Geosystems software we also offer Definiens Professional, the innovative software solution for object oriented image analysis.

GEOSYSTEMS is ESRI Business Partner and completes its competence and product range with the ArcGIS product line. As a company dedicated to selling solutions and not just software modules, GEOSYSTEMS is very active in consulting customers about their projects, in customer specific training and application oriented software development. For further information please see <http://www.geosystems.de>.

About MFB-GeoConsulting GmbH

MFB-GeoConsulting GmbH – on marked since in 1999 - is specializing in "Solutions in Geographic Imaging" for optical and radar earth observation. The company's services do cover a complete range of distribution services including the full range of earth observation data as well as, software solutions for image processing, photogrammetry, 3-D visualizations (exclusive sales partner for Leica Geosystems in Switzerland) and 3-D hardware components. Furthermore we provide advanced services for project management and realization, training and education. The integration and interfacing of image and auxiliary geo data with geographic information and database management systems including the data transmission (field-to-office) is one of the strength of MFB-GeoConsulting. Depending on the customer's need, we offer customer-adapted solutions. Our highly specialized team has a long-term experience in applied remote sensing and earth observation. For further information please contact <http://www.mfb-geo.com>.
